Activity 03 html Tables – Feb 3, 2020
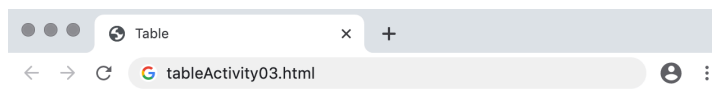

Name: _____ Ulid: _____. Date:_____

  Today will create a table in html and style it with css.

1) Get the **tableActivity03.html** and the **tableStyle.css** from Reggienet as a starting point.

2) Add one more student info in table:
  Name: John; Degree: Computer Science and Graduation: 2022

3) Add the additional table elements(tags): thead, tfoot, tbody, caption

Styling with css
4) **thead and tfoot:** Add background color of your choice, paddings

5) **Table Caption:** Align text to the left, add background color, uppercase

6) **tbody hover:** change the background color to black and font to white.

7) Change the color for odd rows.

8) Once your are finished. Upload your **tableActivity03.html** and **tableStyle.css** in your web server and link it in your **index.html**

9) Also, zip the files **tableActivity03.html** and **tableStyle.css** together and attach to this submission.

   After your styling your tableActivity03.html could look like this.
